

The Flagship Difference

As an organization founded and led by physicians, Flagship Physicians is a unique insurance brokerage committed to providing exceptional service to the medical practices we represent. Our agency is focused on medical malpractice insurance and we have access to all the major, active carriers in Illinois.

Medical, Legal and Insurance Expertise

Expertise in medical malpractice insurance requires a strong knowledge of medical practice as well as the litigation process. Our agency is comprised of physician and attorney agents that are well-equipped to understand your practice and address malpractice risk.

Long-Term Partnership

Our clients partner with us for the long-term, because we focus on a strong working relationship that adds value to your practice. At Flagship, each client is given exceptional service at all times, giving us 100% group client retention since our founding and making us the fastest growing brokerage in Illinois.

Physician Insight in Underwriting

For many of our clients in the underwriting process, we provide additional information to insurers to supplement their application. In the context of malpractice claims, we are able to understand the medicine behind the care provided and advocate on behalf of our clients. Our physician agents have produced literature reviews to help underwriters get a clearer picture of a physician's true risk profile with respect to claims history. We have been able to save our clients tens of thousands in premium.

Evaluating a Broker

We urge medical practices to evaluate their broker relationship on an annual basis to confirm they are getting excellent service, expert consultation, and important market information. You can always switch brokers even if you do not want to switch insurance carriers. This year, choose to work with Flagship Physicians and see the difference.
